

PROJECT DEVELOPMENT

Archetype supports government and private organizations throughout the project development lifecycle. From concept to construction to operation, clients receive the strategic and financial advice necessary to successfully navigate and complete each project development phase. We have unique expertise in supporting infrastructure projects, including renewable and fossil energy plants, waste water treatment plants, railway construction and more.

Solutions

- Public-Private Partnership Development
- Economic & Feasibility Analysis
- Utility Avoided Cost Analysis
- Market Advisory & Finance
- Procurement & Transaction Support
- Real Estate Development
- Bid & Proposal Support

Approach

Archetype's advisory team includes individuals with extensive knowledge and experience in a wide variety of subjects, including project finance, renewable energy development, real estate development, land planning, space utilization, economic development, deal structuring, capital sourcing, construction oversight, and special assets. We utilize our asset management expertise to assemble project teams that provide first-rate assistance for large and small projects. When supporting a project, we assess our client's needs and find solutions to enable them to achieve their objectives. The economic climate, market trends, financial capacity, project scope, and project costs are just some of the factors our experts evaluate in our project development work. Our unique expertise enables us to deliver project development services tailored to fit the specific needs of our clients. Archetype delivers original thinking to complex and challenging projects.
